MOBILE GO CENTER POLICIES AGREEMENT FORM

The policies and procedures for the proper use of the Mobile GO Center were established to ensure the safety of the MGC participants and to prevent any damage to the MGC during its use.

1. Deployments for events should be between 8:00 am - 8:00 PM. If you may need the Mobile Go Center to arrive before 8:00 am or depart after 8:00 PM for an event, you must call the office to see if accommodations can be made.

2. We reserve the right to cancel any scheduled deployment due to inclement weather which could adversely affect satellite signal, and jeopardize the safety of those onboard the unit. We will notify you of necessary cancellations due to changing weather patterns.

3. The Mobile GO Center will need approximately 80-100 feet of parking space and must be 30-60 feet away from any building or obstruction during the event. Please ensure there is space available to allow the Mobile GO Center to enter, park, and exit the event site in a safe manner.

4. The MGC will not exceed its maximum capacity of 20 participants per presentation/session. One MGC staff should be present in the MGC at all times.

5. Do not enter or allow participants to enter the MGC prior to the event start time or until the MGC staff clears the unit for proper use. The Mobile GO Center staff must ensure the hydraulic system is evenly placed prior to guests entering the unit. Even if laptop computers and chairs are set up it does not mean the MGC is ready for visitors. Only MGC staff members are allowed in the unit prior to start time and after the end time of the event.

6. Do not allow participants anywhere near safety cones. These cones are placed as a precautionary measure to prevent accidents (due to electrical cords, wheelchair lift in use, etc.) from occurring in the designated area.
